Mindi Walters Regenerative Eye Cream

#96

Starting Bid **\$30.00**

Donated by **Mindi Walters**

A powerful anti-aging eye treatment using ultrasonic vibration technology. This hydrating formula uses plant stem cells, hyaluronic acid and the power of retinol to improve fine lines and crow's feet, reduce under eye puffiness, dark circles and loss of elasticity. The application wand uses ultrasonic vibration that will leave your eyes looking wide awake and youthful.

Use AM and PM. Gently apply a small amount around the eye area. Use the ultrasonic vibration applicator to help the product absorb and stimulate the skin around the eyes.
