INTEGRA TITANIUM DRIVERS

Specs

Integra prides itself on designing the most technically advanced clubs in golf. Drivers are available in both normal shape and square-head, and most are made from beta-titanium. Driver head sizes are the largest in golf, and some designs, like the Sooo Long and 400 ti, have been banned from official competition by the USGA. Irons are steel-forged and come in both standard-blade and Impreza hybrid

designs with steel shafts and Tour Velvet grips. Graphite shafts come standard with drivers are available in a variety of flexibility levels.

PAX- “Parallel Axis System” beta titanium driver.

Regular flex, 9 degree loft
